

Napa Valley Shelter Project

The Napa Valley Shelter Project operates the only emergency shelters for homeless men, women and children in Napa County.

Our Mission: The Napa Valley Shelter Project will provide safe and humane temporary shelter to Napa County homeless individuals and families and coordinate resources to assist them in acquiring the skills and assets necessary to obtain and maintain permanent housing and self-sufficiency.

Locations and Services: Samaritan Family Center – SFC is an entry point to services for homeless families. Emergency shelter is offered for up to 90 days along with coaching and case management to assist families in becoming financially self sufficient and sustainably housed. It has room for seven families. In addition, up to 3 families may stay for one night only while other temporary shelter is arranged.

The HOPE Resource Center provides showers, toilets, mail, phones, laundry, and other basic services for more than 85 homeless adults daily. A second tier of services, including medical care, job development, housing assistance, legal aid, mental health outreach, and any other services identified to assist this most-hard-to-reach population are also available and encouraged. Screening and referral for the South Napa Shelter is done at the HOPE Center. Vouchers for the Winter Shelter are distributed at this site.

The South Napa Shelter, a facility for clean and sober individuals 18 and older has two primary goals for its guests – increasing income and securing sustainable housing. We help them achieve those goals through weekly coaching/case management, requiring that they volunteer at the center and in the community, and providing the tools and encouragement to succeed. All guests are held accountable for their behavior at the center and in the community. All guests must be referred through the HOPE Center.

The Emergency Winter Shelter provides a safe, warm and dry place to sleep for Napa's most difficult to reach homeless population. There are few requirements for this shelter beyond basic civil behavior. Each year however, people move from the facility into other shelters and eventually sustainable housing. All guests must be referred through the HOPE Center.

- Napa's only homeless shelters
- Addresses core issues of homelessness
- Focus on personal responsibility
- Treats individuals with dignity & respect
- Provides safe and secure environment
- Promotes self-sufficiency
